

Richmark Wands

Our rechargeable RM-MW-RED-RC red marshalling wand is a bright and durable wand has been designed for a range of marshalling activities. This LED wand features a loud (up to 120 dB) SOS alarm and three (3) light modes to capture attention and ensure visibility in any weather or traffic scenario. Visible up to a mile away, you can safely guide your aircraft with these ramp-grade marshalling wands. The wand is powered by a sealed rechargeable battery and is supplied with a 3-pin UK plug and USB cable to connect to the wand.

Our rechargeable RM-MW-RED-RC red marshalling wands are durable, shock-proof and are resistant to impact. The rechargeable wand features a non-slip handle and integrated lanyard. Made of waterproof material and complete with large buttons for easy operation with gloved hands, you can be confident in the performance of these wands in challenging weather conditions.

Each rechargeable wand includes five (5) red LED lights and one (1) white LED for high visibility in the dark and features reflective film inside to intensify the light output. The rechargeable wand features steady and flashing light modes. A third mode activates a white light at the top of the wand, turning it into a flashlight. The SOS alarm button creates a loud, high pitched noise for enhanced safety. The magnetic base allows for easy and secure placement of the wand. The top of the rechargeable wand can be used to break a window if trapped inside a vehicle.

Our rechargeable wands can be used for various applications besides aircraft safety, such as marine signalling, car safety, directing traffic, crowd control, community events (such as walks, bike races, or runs), construction zones, hunting and hiking safety. They can also be used by police, medical teams, and firefighters. Bikers, runners, and walkers use them for increased visibility at night.

Range:

Order Code	Description
RM-MW-RED-RC	Aircraft Marshalling Wand (Single Unit)

Wand Specification

- Three (3) modes: steady, flashing, and white flashlight
