

Jumbo Posts are for use in general access areas on the airfield and are manufactured in a non-rust, medium density PVC. They are suitable for use on all surfaces and can be fixed in the ground with a 205mm fixing pipe.

The main colours are normally White or Black (other colours are available to order).

Jumbo posts are recommended to be spaced 2m apart for maximum benefit. Each post can be fitted with retroreflective sleeves. These are 250mm in length and available in Red, White, Blue, and Yellow options.

Coloured Retroreflective Sheaths required two per post

Dimensions:

1000mm x 150mm diameter

Accessories:

Ground Mounting Kit

Hole Cutter (Auger)
